

## ULTRASOUND OF FEMALE PELVIS:

Real-time sonography of the pelvis was performed transabdominally utilizing the bladder as an ultrasonic window.

The uterus appears \_\_\_\_\_ and measures \_\_\_\_\_ cm from fundus to cervix x \_\_\_\_\_ cm transversely x \_\_\_\_\_ cm in AP dimension. Normal myometrial echoes are noted. There is no evidence of intrauterine gestation. The endometrial complex measures \_\_\_\_\_ cm. Normal endometrial echoes are noted.

Right ovary measures \_\_\_\_\_ cm x \_\_\_\_\_ cm x \_\_\_\_\_ cm.

Left ovary measures \_\_\_\_\_ cm x \_\_\_\_\_ cm x \_\_\_\_\_ cm.

Both ovaries show normal color doppler flow.

No adnexal masses are present.

No free fluid is seen in the cul-de-sac.

Visualized urinary bladder appears grossly normal.

IMPRESSION: Normal female pelvic ultrasound.
